SULLIVAN ROOFING CELEBRATES TEN YEARS OF SETTING THE STANDARD FOR COMMERCIAL ROOFING IN CHICAGO

The area's fast-growing commercial roofing company reaches first milestone of many.

Schaumburg, IL— (April 14, 2009) — Sullivan Roofing, Inc., the leading commercial, industrial and architectural sheet metal roofing company in the Chicago area, marks its 10th year of trendsetting, dependability and unparalleled customer service. Recognized throughout the industry as Carlisle SynTec's leading and most proficient roofing contractor nationwide, Sullivan Roofing has been awarded the prestigious Carlisle SynTec ESP (Excellence in Single-Ply) for eight years running. Sullivan Roofing has built its reputation on a simple premise: satisfy the client every single time. Since its inception, Sullivan's ability to deliver a quality product and superior workmanship at an unbeatable price has put Sullivan Roofing in the vanguard of Chicago area commercial roofing.

"We are very proud to commemorate a decade at the forefront of the Chicago-area commercial roofing industry," says Timothy Sullivan, president of Sullivan Roofing. "The company's success would not have been possible without the help and dedication to excellence from every single Sullivan employee. Their desire to be the very best at what they do has made Sullivan the best at what it does. But Sullivan Roofing is not a company that rests on its laurels—for us, this is just the beginning."

Sullivan Roofing's success is a testament to Timothy Sullivan's drive and determination to take a customer-focused approach to commercial roofing and make it succeed. The company started in 1999, with one truck and one employee—Timothy Sullivan. Today Sullivan Roofing has over 100 employees, a fleet of service vehicles, a 23,000 square foot facility and the best reputation in the commercial roofing industry.

Long considered the industry leader in customer satisfaction, Sullivan Roofing also leads the pack in growth. The company has completed over 3,000 roofing projects covering over 74 million square feet in less time than any other roofing contractor in their area—making them the fastest growing commercial roofing company in the Chicago area. The company's prowess is well-known to industry insiders, especially since Sullivan's quality rating is in the top one percent of all Carlisle applicators in the country.

The company's commitment to cost savings and cooperative customer service now leads Sullivan to focus its future growth on roofing maintenance and repair. "We are looking forward to many more strong years ahead for Sullivan Roofing," explains Sullivan. "In these difficult times, Sullivan Roofing is in a perfect position to provide an expanding range of services which will help our clients get many additional years from their current roof without sacrificing security, functionality or safety.

Whether it is a new project or maintenance on an existing roof—our clients know that the work comes with the Sullivan commitment to client satisfaction."

In addition, Sullivan Roofing is focusing on raising the bar within its maintenance and repair department. The company's online, 24-hour database and project management system is designed to offer real-time status reporting and allow customers to access work orders, invoices, field reports, and review images of their project as it progresses towards completion—and will, in turn, save their clients money. Sullivan president Timothy Sullivan feels that the investment in this system was as central to their business model as any investments in equipment, vehicles, technology or knowledge. It was one more way for Sullivan Roofing to offer its customers the very best in customer service.

Adds Sullivan: "Our history of success, growth and customer-first attitude has laid a firm foundation for what lies ahead. While other companies may be comfortable being 'established'; we are just getting started. We are only as good as the clients we satisfy down the road—but we cannot wait to meet the next satisfied client!"

Founded in 1999, Sullivan Roofing, Inc. uses products from a variety of leading roofing manufacturers and is a single source, certified Carlisle SynTec applicator installing Carlisle's complete line of products. Sullivan also has a full state-of-the-art architectural sheet metal fabrication shop that makes all of the company's roof-related sheet metal flashing in-house. The company specializes in architectural standing seam metal roofing, insulated wall panels and composite metal wall panels and uses sheet metal products from manufacturers such as Petersen Aluminum and McElroy Metals. The company is the leading commercial roofing contractor in the Chicago area for new roofs, maintenance and service and has helmed several high profile projects throughout northern Illinois and southern Wisconsin including: the Sears Centre Arena, Cabela's, and John Deere's Distribution Center. Currently, Sullivan is the exclusive roofing contractor working on one the prestigious Metea Valley High School in Aurora, Illinois. Additionally, Sullivan Roofing sets the industry standard with its maintenance program, material and labor guarantees, quality assurances and a comprehensive safety program. Sullivan Roofing's mission is to provide its clients with the very best in safety, quality, production and service.
